

NEW!

Bikkel LED-dimmer

The Bikkel is a compact universal build-in dimmer for LED-lighting up to 100VA and a maximum of 13 separate LED-lights or drivers.

TEACH YOUR OLD SWITCH NEW TRICKS

The Bikkel is easily installed behind the existing lightswitch. This way you can transform your traditional lightswitch into a smart LED-dimmer with ease. It is possible to install the Bikkel in series to the light, but also separately to the potential free switch.

AUTOMATICALLY TUNED

tuning the bikkel is easy. It does all the work for you. The autotuning in the software automatically adapts to the connected load. The minimum light level can be set in steps of 6%.

ART. NR. 890300

- ✓ Minimum load of just 1W
- ✓ For all brands of switching materials
- ✓ No neutral wire needed
- ✓ Suitable for retrofit LED
- ✓ Suitable for LED with external driver
