

## Universal LED-dimmer 891042

### FOR MOST COMMON TYPES OF LED LIGHTING

Our new dimmer the "D-PAF200-LED" is ideal for dimming various types of LED lighting. Whether you are using retrofit or professional lighting with an LED driver, the D-PAF200-LED, is capable of dimming lights with "trailing edge technology" (tronic, RC). The software analyzes the fluctuations in the load and adjusts the dimmer accordingly.

You are not limited when choosing which cover you want for your dimmer. The dimmer can be covered with almost all common cover materials from the well known brands.

With our fine adjustment you can optimize the bottom of the power between 5% and 30%.

The D-PAF-200-LED is also equipped with a change-over contact for integration in hotel circuits.

- ✓ Minimum load of just 1W
